Rail Specifications

Our unique clip system secures the rail into post. The triple-ribbed rail design provides extra impact resistance while maintaining flexibility for the safety of your horses.

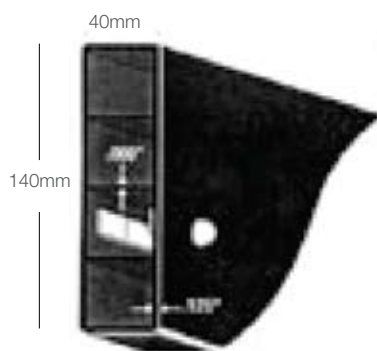

Spacing Specifications

Rails are 4.8m long and designed to alternate between posts to increase strength. Posts are placed at 2.4m centres.

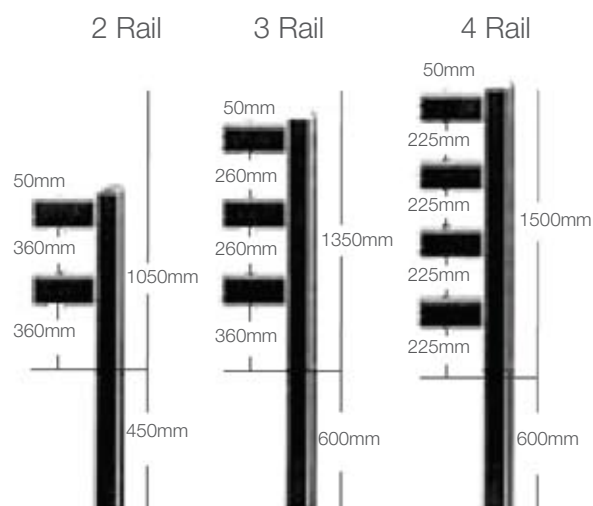

Post Specifications

125mm x 125mm x 4mm wall thickness ensures superior strength

140mm x 40mm x 4.8mm triple ribbed 3mm outer wall thickness
